Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This action is responsive to the Board of Appeals decision of May 26, 2004.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martin, Jr. in view of the Prior Art admitted by Applicant on page one of the specification, see MPEP 2129.

Martin, Jr. show a mixing faucet where the lower part of casing 11 is read as a connection element, adaptor 50 is the insertion piece with seals 80, 37. Adaptor 50 is inserted in the longitudinal direction of the cartridge.

The Martin, Jr. valve is displaced and rotated in a customary manner but Martin, Jr. is not explicit about the actuation. Applicant has admitted to Prior Art including a control disc driven through a ceramic moving element by means of a driving arm pivoted in a rotatable lever holder to displace and rotate the control disc. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used such a Prior Art actuator to displace and rotate the Martin, Jr. control disc in that it is one of the customary means of doing so, as suggested by Martin, Jr. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 703-308-2595. The examiner can normally be reached on Maximum Flextime.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherble can be reached on 703-308-1257. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
